

# Halma Water Management

## Palmer Environmental

*The worlds largest supplier of leak detection and pressure control equipment to manage leakage in water networks. Designed the first correlator in 1979 and have pioneered acoustic noise logging and fixed network systems.*

## Radcom Technologies

*Market leader in the design and manufacture of rugged, innovative data logging and telemetry equipment for water and environmental industries. Now introducing innovative Wastewater solutions.*

## Hydreka

*Specialised flow measurement systems for all parts of the water cycle, including open channel systems and environmental monitoring.*

## Fluid Conservation Systems

*Market specialist in the USA for Palmer, Radcom & Hydreka products.*

## Halma Water Management

**Four water conservation experts now working together as one, with one name, one sales force, one global distribution network and one board of directors.**

**HWM successfully combines the reputation, experience, innovation, knowledge, products and customer service of these four well respected companies into one global solution for the industry.**

# Water Management Is Our Business

## Environmental Monitoring Solutions

# How Do You Manage Water Effectively?

The most effective way to manage water is to divide your network into zones.

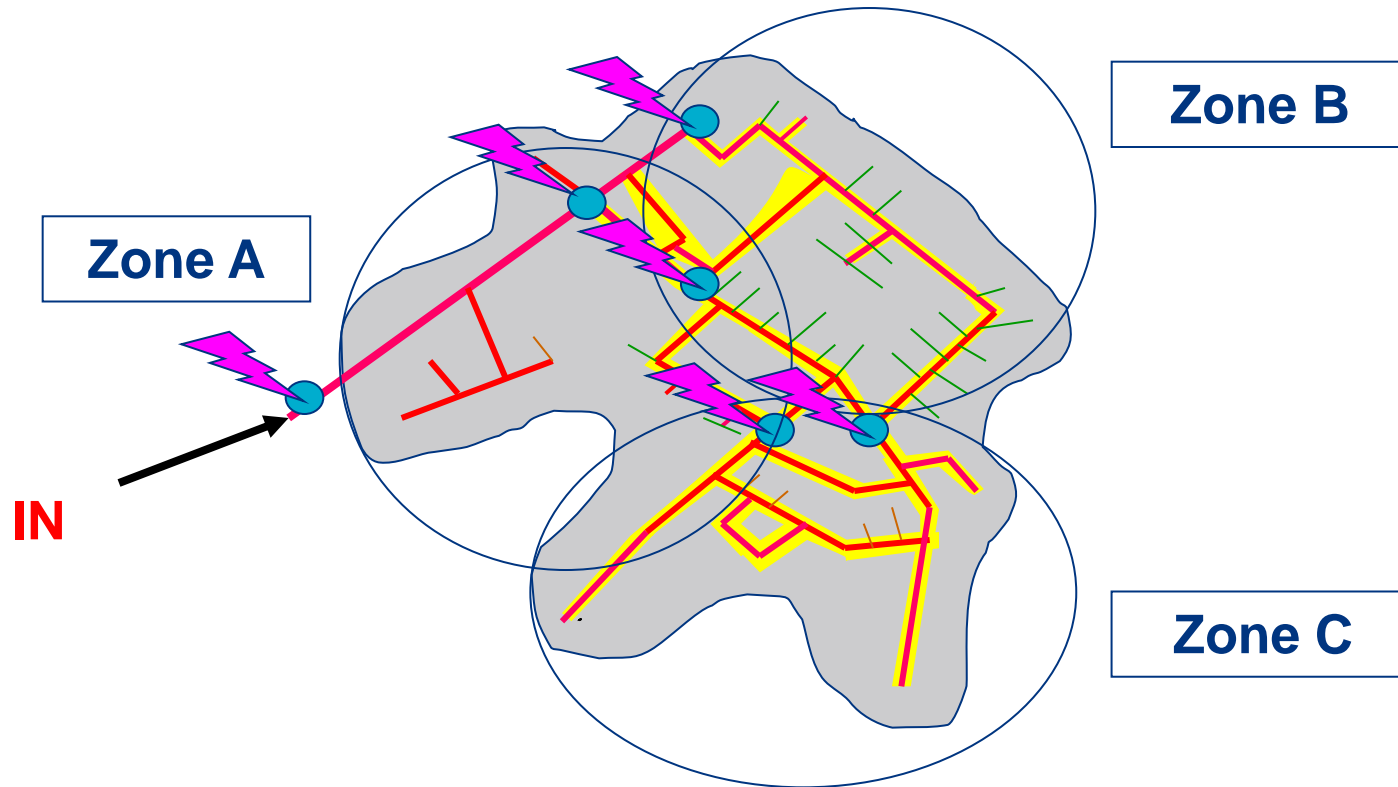

# How Do You Manage Water Effectively?

In the UK, each zone typically contains approximately 1,500 properties  
These are known as District Metered Areas (or DMA's)

# How Do You Manage Water Effectively?

Water entering each zone is monitored and logged and the data used to calculate usage within the DMA. Unexpected increases in water can indicate potential leakage.

# Leak Detection Solutions

## Leak Detection Solutions

# Why Detect Leaks?

*“Throughout the world, water resources continue to be spoiled, wasted and degraded. The consequences for humanity are grave”*

Ban Ki Moon  
United Nations  
Secretary-General  
December 2007

# Leak Localisation – Noise Logging

Halma Water Management

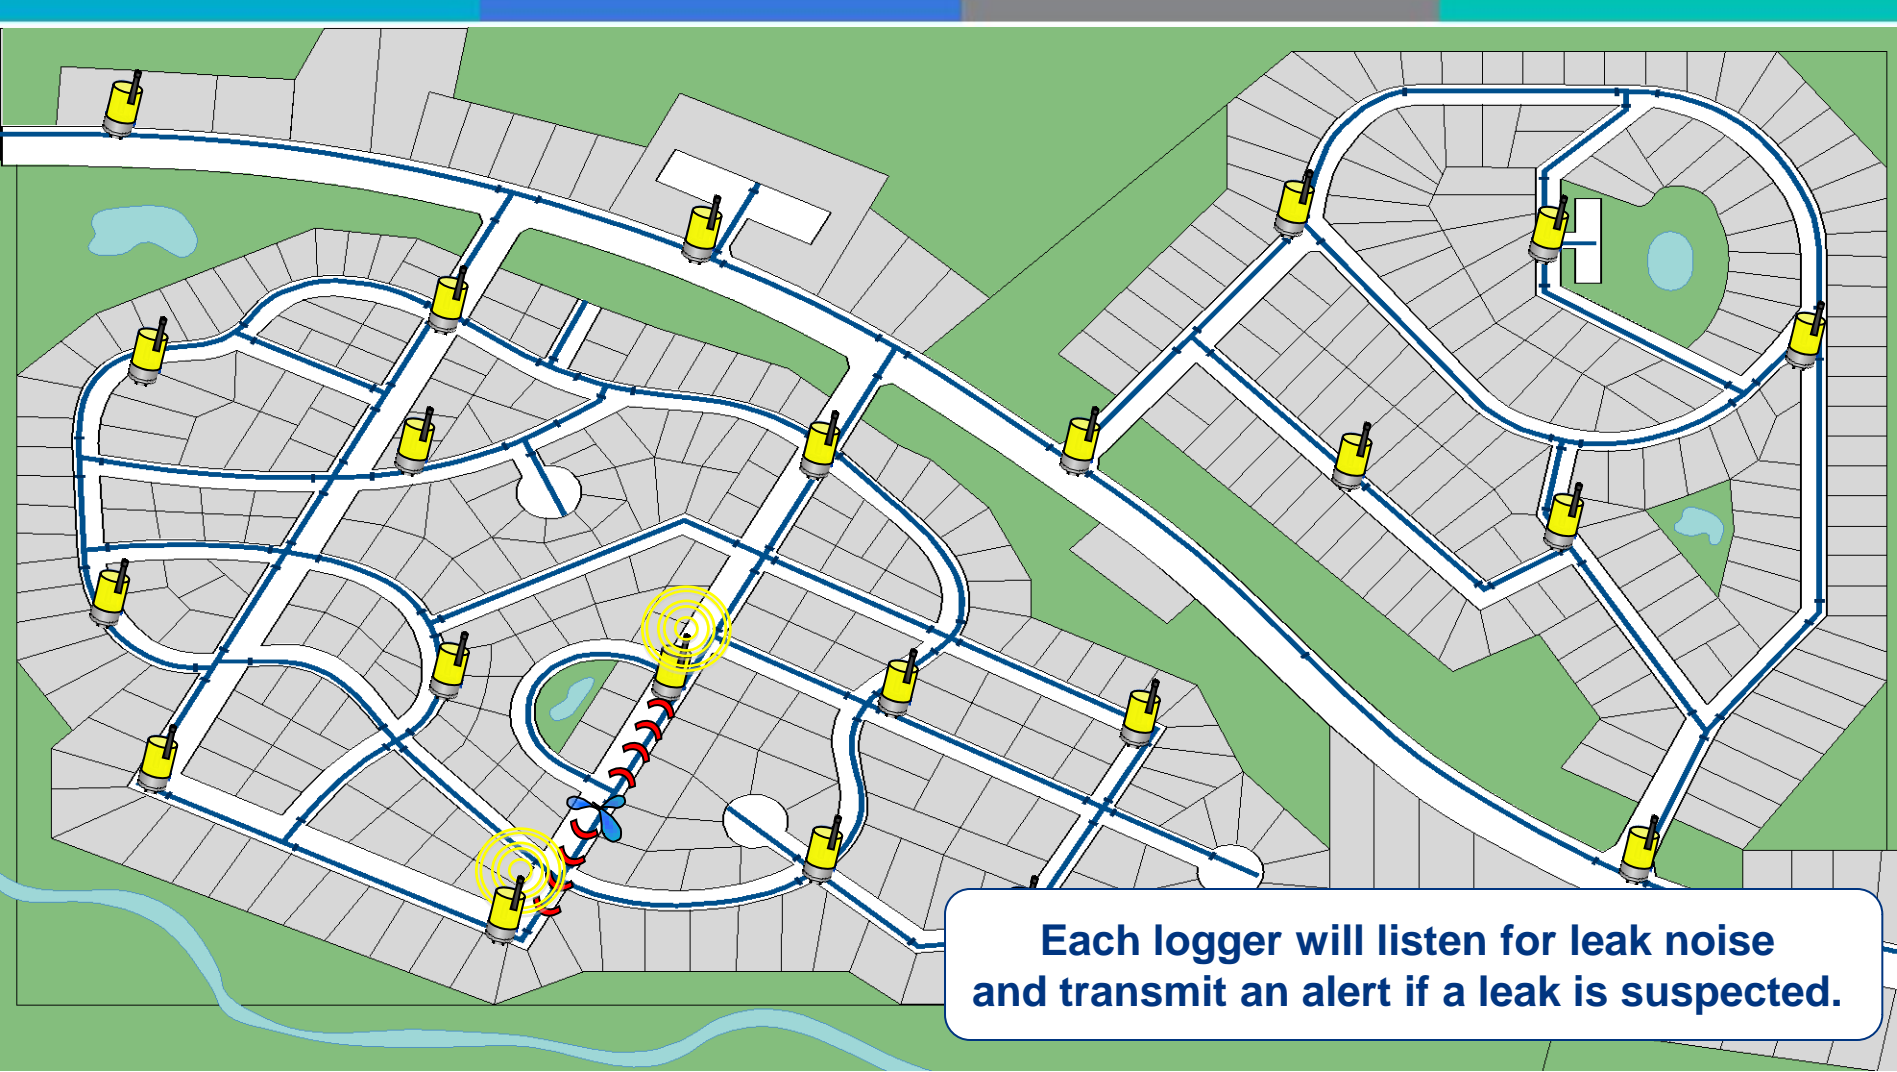

Noise loggers can be quickly positioned at intervals throughout the DMA to detect the noise created by leaks. They are easily deployed on valves using magnets and can be placed permanently or moved from site to site with no interruption to water supply.

# Leak Localisation – Noise Logging

Halma Water Management

**Each logger will listen for leak noise and transmit an alert if a leak is suspected.**

# Leak Localisation – Noise Logging

Halma Water Management

**Permalog+®**

*Permalog+ is an intelligent noise logger designed for permanent deployment or tactical deployment to survey large areas of network quickly and effectively*

- Fully automatic intelligent logger
- Adaptable to all network situations
- Innovative design for rapid deployment
- Compact size
- Low unit cost
- Long battery life (5-7 years)
- Patent protected
- Aqualog extended logging mode
- Flexible Data Collection:
  - “Lift and Shift”*
  - “Drive By Mode”*
  - “PermaNet via Radio Network”*
  - “PermaNet via SMS Repeater”*

# Leak Localisation – Noise Logging

Halma Water Management

**Since the Permalog+ was launched in 2007, over 40,000 units have been deployed successfully throughout the world.**

**When these figures are combined with sales for older models, there are now over 200,000 Permalogs in circulation worldwide.**

**Made in Wales**

A HALMA COMPANY

# Leak Localisation – Noise Logging

**Areas using Permalog with drive-by data capture include:  
Las Vegas, El Paso, Hong Kong, Thames Provinces,  
Birmingham, Beijing, Murcia, Almeria & Metz**

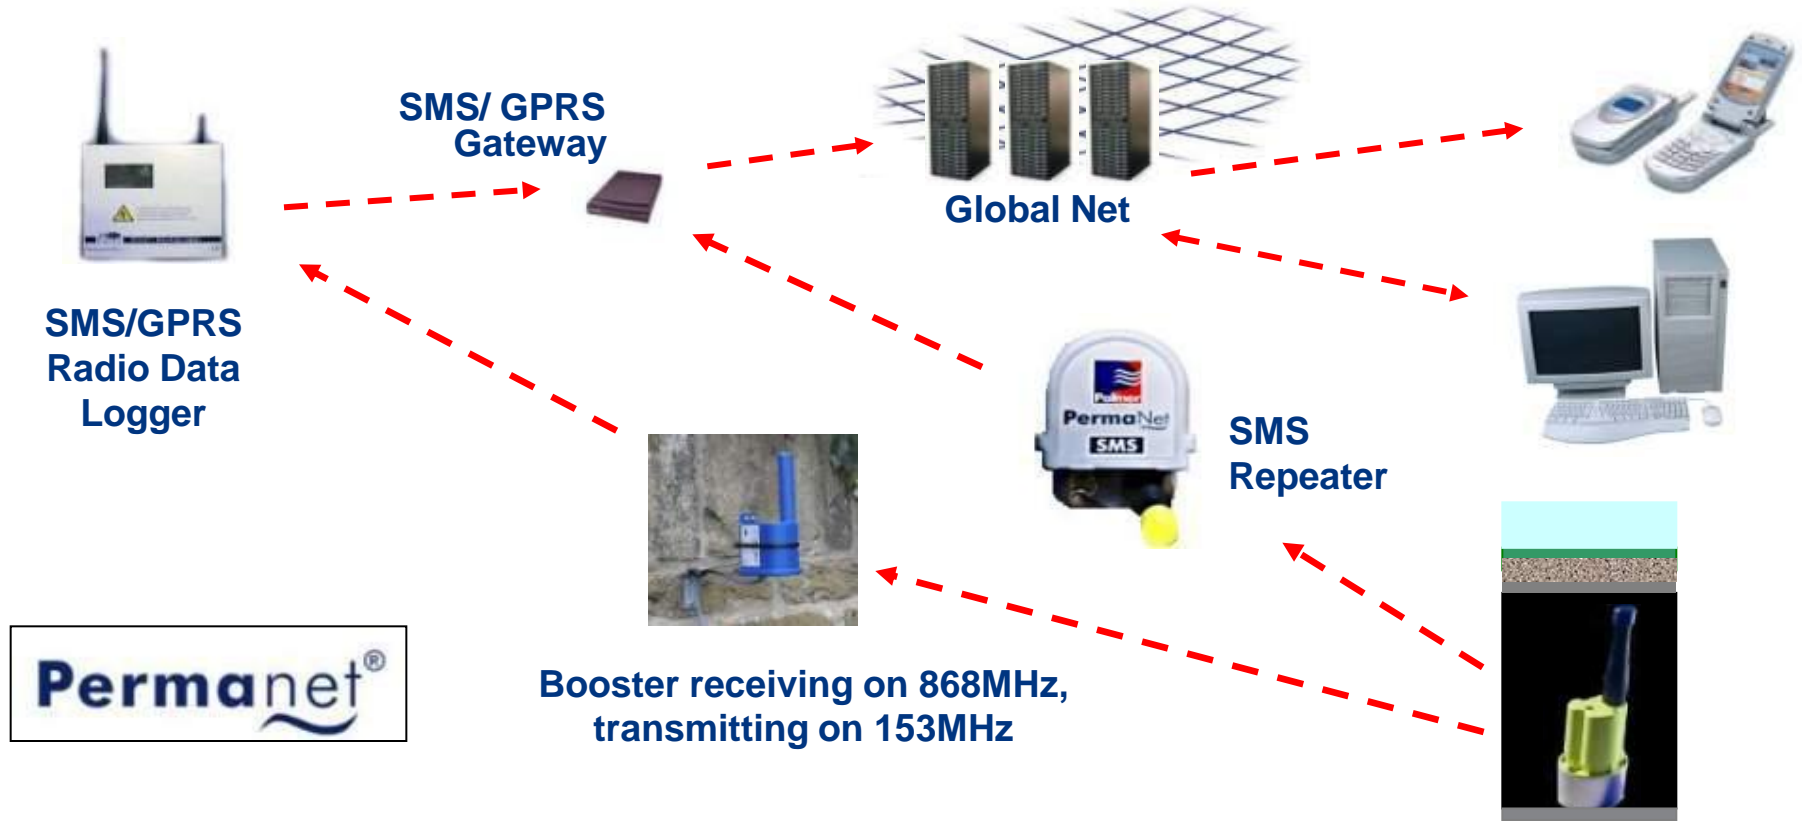

**Patroller II  
Drive-by Data Capture**

*PDA based  
Faster drive-by for  
reduced patrol times  
Distance of  
transmission up to  
150m from logger*

# Leak Localisation – Noise Logging

Halma Water Management

Booster receiving on 868MHz,  
transmitting on 153MHz

As an alternative to drive by data capture, permanently deployed Permalogs can be combined with **Network Radio** or **SMS Repeater** to send leak data directly to an office PC or mobile phone via dedicated web hosted or local software packages.

# Leak Localisation – Noise Logging

## Benefits of the PermaNet fixed leak detection network

- Automatic leak alarm
- Immediate response
- Critical areas under control

**Areas with a PermaNet fixed leak detection network currently include Hong Kong, Birmingham, Inverness, Barnsley, Tonsberg, Cambridge University & Metz**

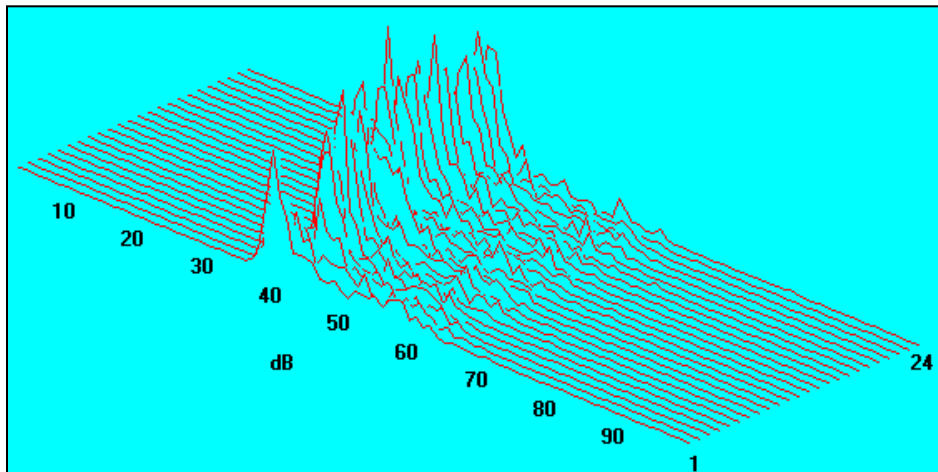

**Permanet**<sup>®</sup>

# Leak Localisation – Noise Logging

Permalog+ unit in “Aqualog” recording mode showing noise level and spread. This profile indicates a leak.

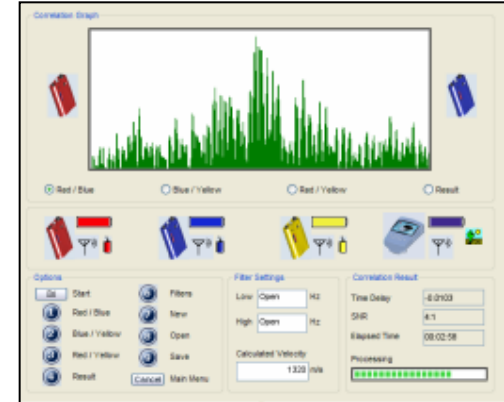

Permalog+ unit in “Aqualog” recording mode showing noise level and spread. This profile indicates no leak.

# Leak Detection - Correlation

The correlation formula

$$L = \frac{D - (V \times T_d)}{2}$$

# Leak Detection - Correlation

**MicroCorr 7**  
PDA/PC based Leak  
Noise Correlator

*Analogue sensors  
PDA/PC interface  
Highly portable  
Bluetooth technology*

**MicroCorr DX**  
Digital Leak Noise  
Correlator

*Digital sensors,  
transmission and  
processing  
Compact design*

**MicroCALL +**  
Digital Leak Noise  
Correlator

*Automatic 3 outstation  
correlation  
Colour graphics  
Advanced software*

**SoundSens "i"**  
Correlating Noise  
Loggers

*Infra Red download  
Fast deployment  
Custom recording  
Cases can be linked*

# Leak Detection – Confirmation

**Lmic**  
**Electronic listening**  
**stick**

*Portable*  
*Lightweight unit*  
*Easy “trigger” operation*  
*Volume/sensitivity rotary*  
*control*  
*Excellent performance*

**Xmic**  
**Digital Ground**  
**Microphone**

*Increased functionality,*  
*display, filters*  
*Minimum (noise) level*  
*profiling (MLP)*  
*Wind / airborne noise*  
*protected foot*

**Xmic Lite**  
**Ground Microphone**  
**System**

*High quality sound*  
*Auto and manual filtering*  
*Multi function display*  
*Minimum (noise) level*  
*profiling (MLP)*  
*Hand probe attachment*

# Leak Detection – Customer Side Leakage

Halma Water Management

**Leakfrog**  
Meter leak analyser

*Used on pulse output meters  
Monitors minimum flow rate*

*Innovative low cost design  
Rapid deployment  
Shows leakage, wastage  
and flow  
Rugged & lightweight  
Long battery life*

**SMART View**  
Automatic meter reader

*Leak alarm for the home  
  
Wirelessly connects to the  
SMART Log meter reader  
attached to the pulse meter  
  
Enables customer to view  
their total, average, previous  
and current water  
consumption*

**Leak Finder**  
Pinpointing system

*Primarily designed for CSL  
but also effective for difficult  
leak situations  
(e.g. plastic pipelines)  
  
Highly accurate  
Works on pipes with a  
smooth internal bore up to  
50mm diameter*

# Pressure Control Solutions

## Pressure Control Solutions

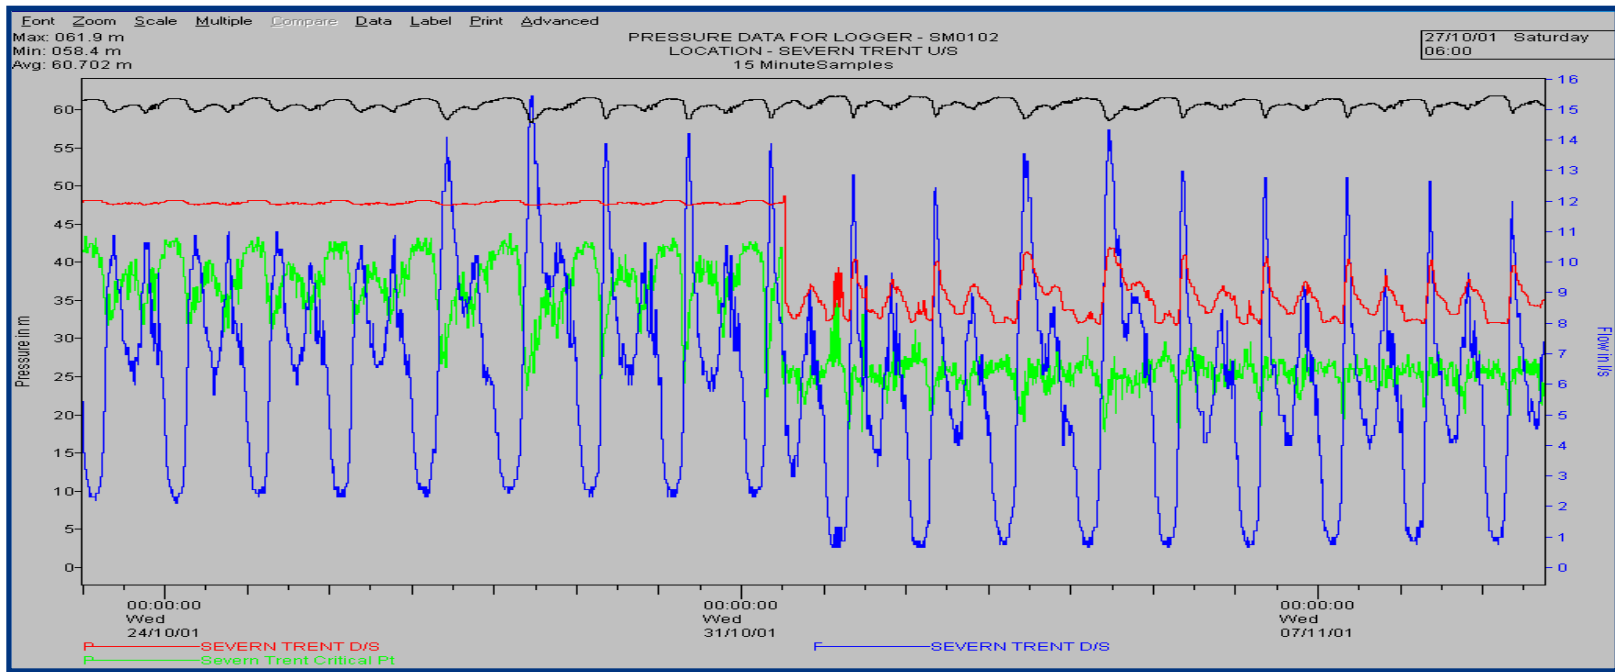

# Why Control Pressure?

Halma Water Management

- To save water by reducing pressure when demand is low (e.g. at night)
- To reduce the quantity of water lost through leakage
- To extend asset life
- To reduce burst frequency

# HWM Pressure Management Solutions

## Hydraulic Actuator Accurate PRV Control

*Long life brass build  
Acts as the interface  
between hydraulic PRV  
and electronic controller  
Fitted in place of the  
adjusting screw on the  
standard pilot on PRV  
Easy to install*

## ControlMate 2 Pressure Management System

*Enables pressure into  
a zone to be switched  
between two pre-set  
values (low and high)*

*Easy to use.  
Self contained.  
5 year battery life.*

## ControlMate FM Pressure Management System

*Enables pressure into a  
zone to be continually  
adjusted according to  
actual demand (flow  
modulation) or a pre-  
programmed time.*

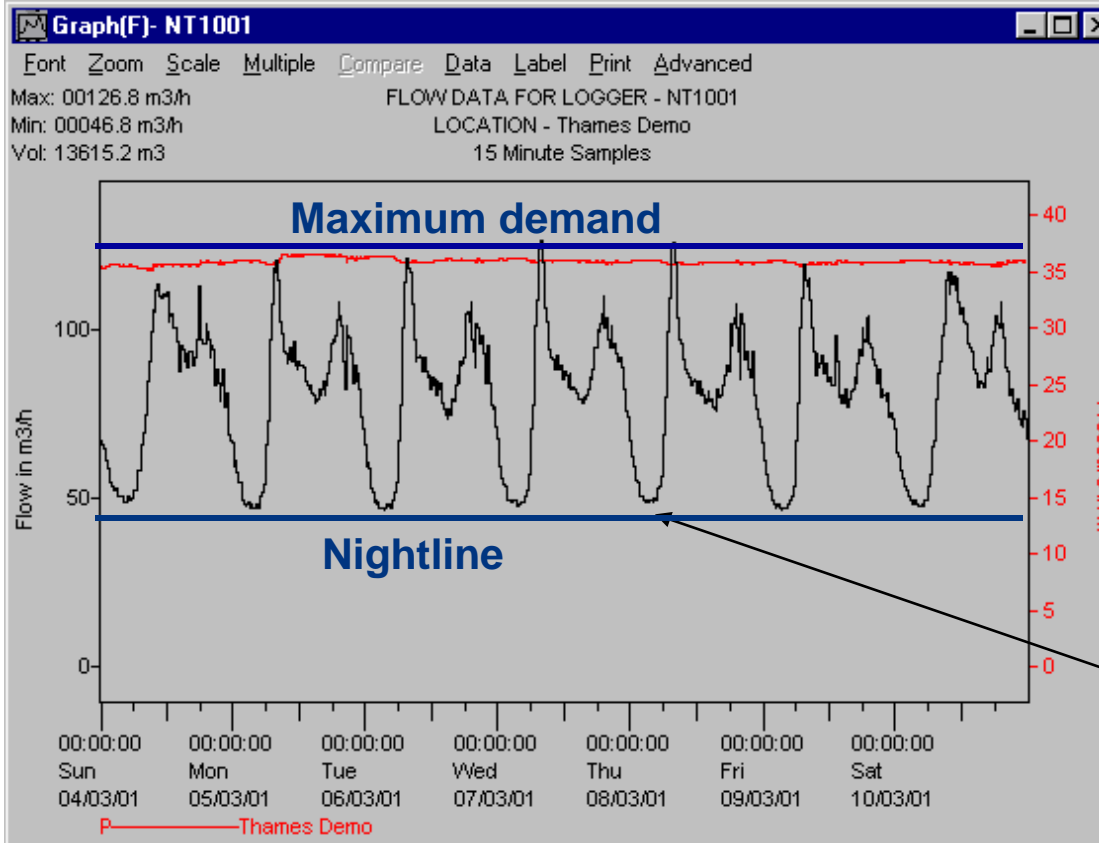

*Maximum potential  
water savings.*

## ControllerCom High Visibility Comms

*Can be fitted to any  
HWM controller  
Logs data  
Two way SMS reporting  
GSM communication  
Alarm option  
Fully adaptable  
Versatile set up options.*

# Water Management Without PRV Controller

- Fluctuating demand
- Constant pressure
- Total week's flow in this example: 13.6MI

**Lowest demand.  
Pressure much too high  
at night.**

# Water Management With PRV Controller

Halma Water Management

- Fluctuating demand
- Pressure adjusted accordingly
- Pressure falls and the flow drops
- Total weeks flow in this example: 12.8MI

**Immediate  
water saving  
of 6%**

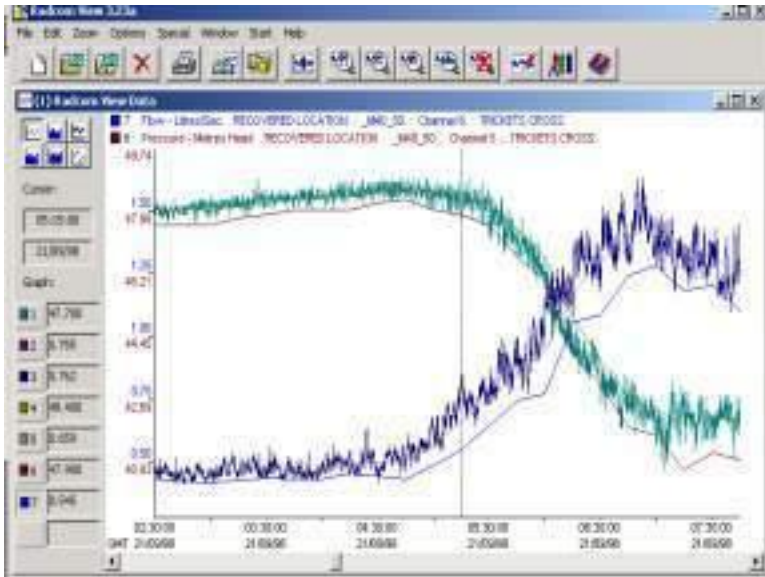

# Data Logging Solutions

## Data Logging & Telemetry Solutions

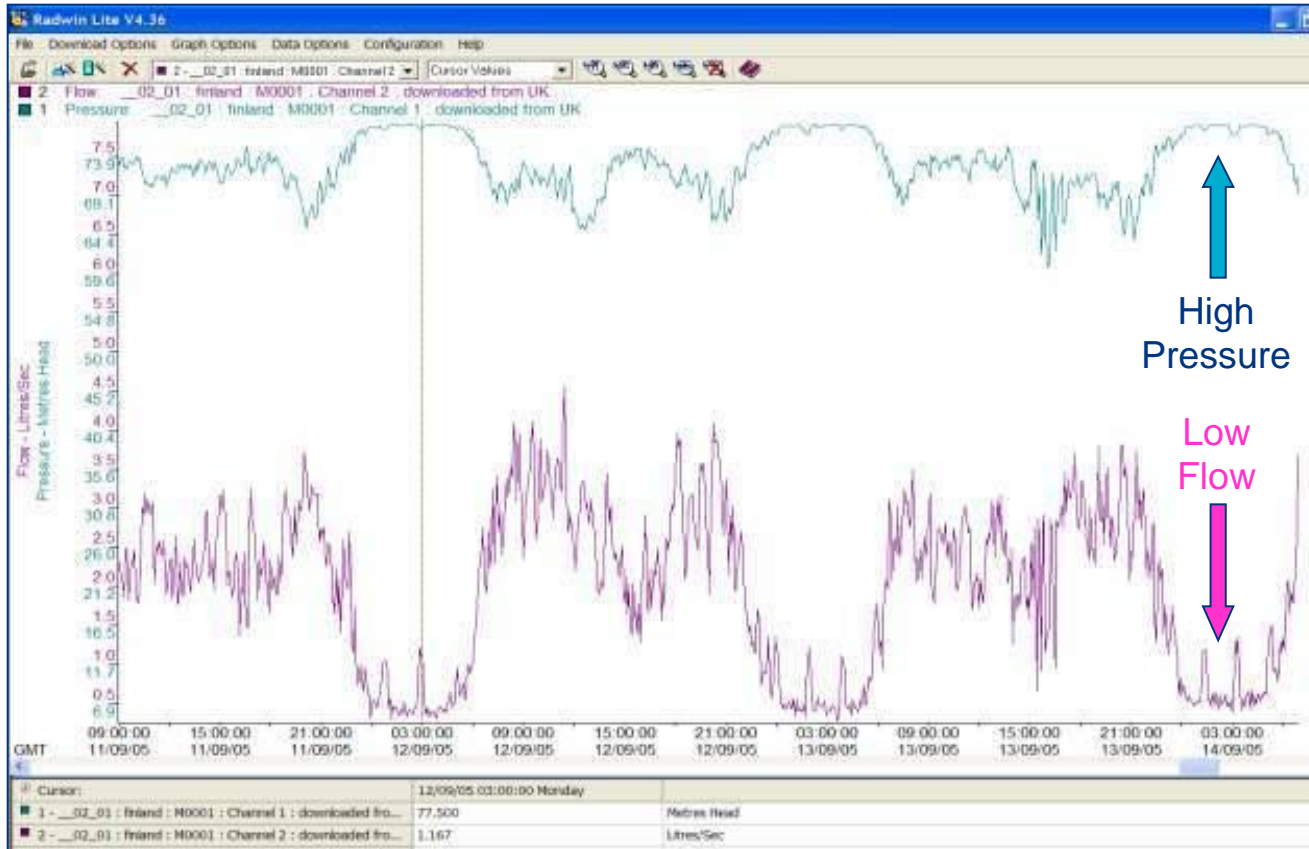

# Why use Data Loggers?

- To gather data on network performance
- To plan network expansion, pressure zones, DMA's
- To create network models
- To ensure regulatory compliance
- To measure leakage
- To verify performance of Pressure Reducing Valves (PRV)

# Why use Data Loggers?

Data received from a two channel logger recording flow and pressure from the same site.

Data collected from the logger shows that when the flow of water is low during the night, the water pressure increases. This feeds leaks and increases water lost through leakage.

In this example, HWM provided the equipment needed to regulate the pressure automatically, thereby making instant savings in water consumption.

- **Portable Data Logging**

*LoLog, LoLog LL/Vista, Pressure Transient*

- **Data Logging with Telemetry Options**

*MultiLog LX, MultiLog SMS/GSM, MultiLog GPRS*

# Data Logging – Portable Solutions

Halma Water Management

## LoLog Single Input Channel

*Can be attached to any pulse output meter.  
Can be used to help planners assess demand in residential areas.  
Waterproof and portable  
IP68 submersible  
5 year battery life  
Infra Red  
Rugged Design*

## LoLogLL / Vista Two Input Channels

*All LoLog features with one or two input channels  
Memory 16,000 readings  
LCD display (Vista only)  
Vista can be used as a solid state pressure gauge, or local indicator for other electrical signals (e.g. digital flow meters)*

## Pressure Transient Specialised logger

*Ideal for monitoring rapid pressure changes in water pipes generated by pumps, Pressure Reducing Valves (PRV) and other valves.  
Supplied with one input for an external pressure transducer.*

# Data Logging with Telemetry Options

Halma Water Management

## MultiLog LX Mid Range Data Logger

*One or two digital flow  
input capabilities.  
Internal pressure sensor  
Advanced SMS data  
compression  
Ideal for monitoring flow  
and/or pressure to assess  
demand, leakage and  
conformance.  
5 year battery life.*

## MultiLog SMS/GSM Advanced Data Logger

*PSTN, SMS & GSM  
Up to 4 inputs.  
Monitors any combination of  
digital or analogue signals.  
No maintenance for 5 years.  
Can perform dynamic flow  
and pressure analysis of  
network models.  
Can conduct "fast sampling".  
5 year battery life.*

## MultiLog GPRS Cellular Telemetry Logger

*Downloads data to PC by  
sending an email directly  
from the logger.  
Can send hourly data if  
required for near real time  
monitoring – making it ideal  
for dynamic flow and  
pressure analysis of  
network models.*

- Scottish Water – establishment of DMA's across the country 6,000 loggers
- 3-Valleys – Telemetry reporting for network management
- Thames Water – Commercial Meter Logging – 10,000 logger units
- Jahor Bahru, Malaysia – 1,200 network loggers installed

**There are currently over 80,000 data logger units supplied worldwide**

# Automatic Meter Reading Solutions

## Automatic Meter Reading Solutions

# Automatic Meter Reading - SMART System

Low cost alternative to fixed network AMR

Rapid drive-by download speeds

Can be used to:

- *provide accurate customer billing*
- *monitor customer side leakage,*
- *enforce drought restrictions*
- *apply rising block and/or seasonal tariffs*
- *detect meter fraud.*

# Automatic Meter Reading - SMART System

## SMART Log Pulse Meter Reader, Logger and Transmitter

*Can log 12 months data  
at 30 minute intervals  
Transmits at 2 second  
intervals for rapid drive by*

*2 way wireless download  
Can be retrofitted to  
most meters in minutes  
Waterproof to IP68*

## SMART USB R\* Patrol Vehicle Receiver

*Provides two way data  
transfer. Easily moved from  
one vehicle to another.  
Rapid drive by download  
speed. A 1 month profile at  
30 minute intervals can be  
received in 2-3 seconds.*

*Data is protected & secure  
and can be received by a  
vehicle up to 100m away.*

## SMART Patrol Drive By PC Software

*User friendly display  
captures, analyses and  
constructs flow history for  
field and office analysis.*

*Meter reader can plan route  
and install new devices in  
the field. Colour coded  
progress indicator bars  
maximise efficiency*

# Automatic Meter Reading - SMART System

*Introducing  
the World's First Integrated  
AMR and Leak Detection Solution*

With the new SMART Log meter reader, patrol teams can now collect combined data for both leak detection **and** meter reading via the same handheld Patroller PDA saving time, petrol and manpower.

# Flow Measurement Solutions for the Water Network

## Flow Measurement Solutions

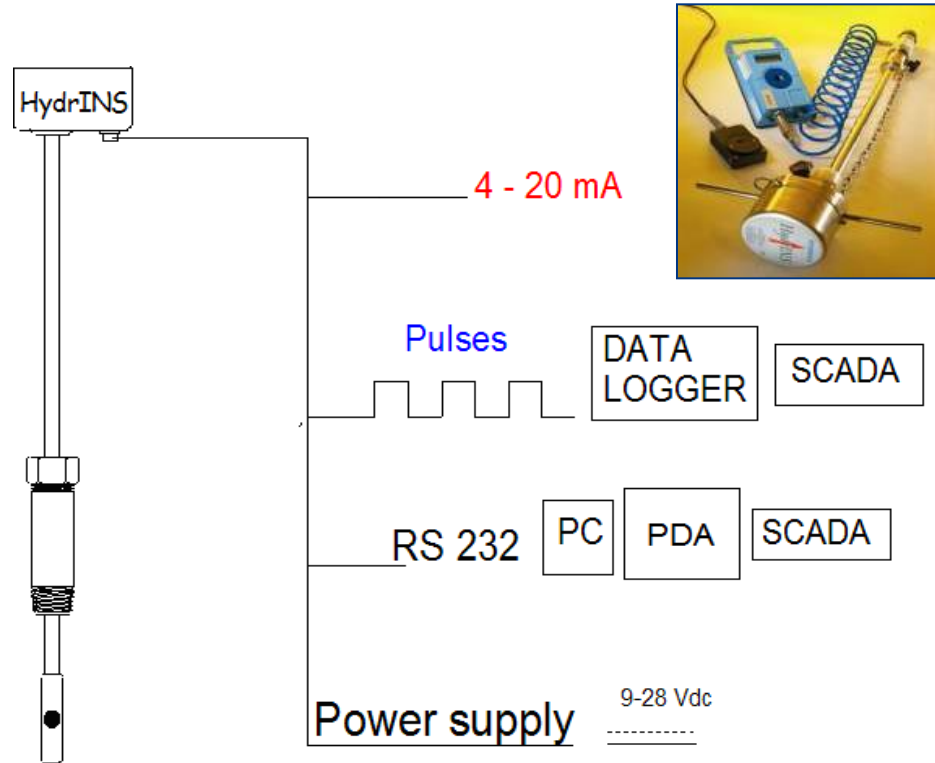

# Flow Measurement Solutions – HydrINS 2

## HydrINS 2 Electromagnetic Insertion Flow-Meter with Optional LCD Screen

*Flow and pressure measurement.  
Measures water velocity in full pipes.  
Advanced processing techniques provide high accuracy even at low flow rates.  
Easy installation with hot-tap capability.  
Choice of stem lengths.  
Submersible transmitter.  
Sturdy construction (3mm thickness on 700mm and 1000mm stem lengths)*

**HydrINS can be quickly connected to computer devices, external loggers or SCADA systems and can operate using mains or battery power.**

# Flow Measurement Solutions – HydrINS 2

## HydrINS 2 Electromagnetic Insertion Flow-Meter with Optional LCD Screen

*Flow and pressure measurement.  
Measures water velocity in full pipes.  
Advanced processing techniques provide high accuracy even at low flow rates.  
Easy installation with hot-tap capability.  
Choice of stem lengths.  
Submersible transmitter.  
Sturdy construction (3mm thickness on 700mm and 1000mm stem lengths)*

Probe head with flow direction arrow and alignment bars

Communication Port & Pulse output

Safety chain

Plastic stopper C

Brass clamping nut

Pressure monitoring port

Sensor

# Flow Measurement Solutions – HydrINS 2

## HydrINS 2 Electromagnetic Insertion Flow-Meter with Optional LCD Screen

*Flow and pressure measurement.  
Measures water velocity in full pipes.  
Advanced processing techniques provide high accuracy even at low flow rates.  
Easy installation with hot-tap capability.  
Choice of stem lengths.  
Submersible transmitter.  
Sturdy construction (3mm thickness on 700mm and 1000mm stem lengths)*

**HydrINS is one of the most accurate flow measuring devices available on the market, particularly at low flows**

**Probes can be supplied in 4 different insertion lengths depending on the pipe size:**

**300mm (12")  
500mm (20")  
700mm (27")  
1000mm (39")**

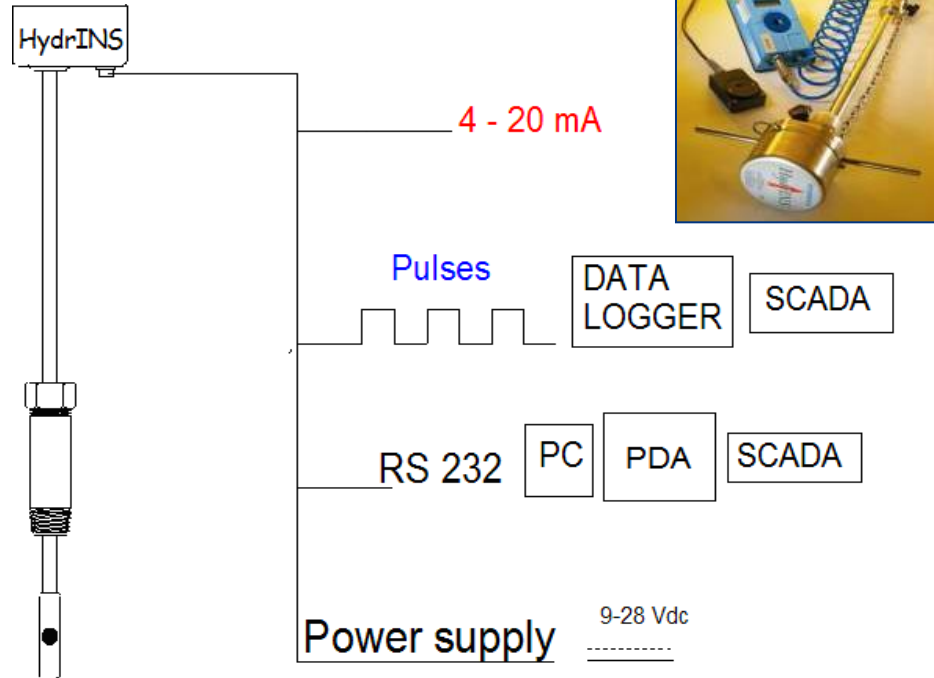

**They can be used on any pipe between 100mm (4") to 8000mm (360")**

# Flow Measurement Solutions – HydrINS 2

## HydrINS 2 Electromagnetic Insertion Flow-Meter with Optional LCD Screen

*Flow and pressure measurement.  
Measures water velocity in full pipes.  
Advanced processing techniques provide high accuracy even at low flow rates.  
Easy installation with hot-tap capability.

Submersible transmitter.  
Sturdy construction (3mm thickness on 700mm and 1000mm stem lengths)*

**The head is 100% watertight and programmable to give spot values and totalised readings in forward or reverse direction.**

**Two batteries, both site replaceable provide 30 months battery power logging at 30 second samples.**

# Flow Measurement Solutions - ChronoFLO

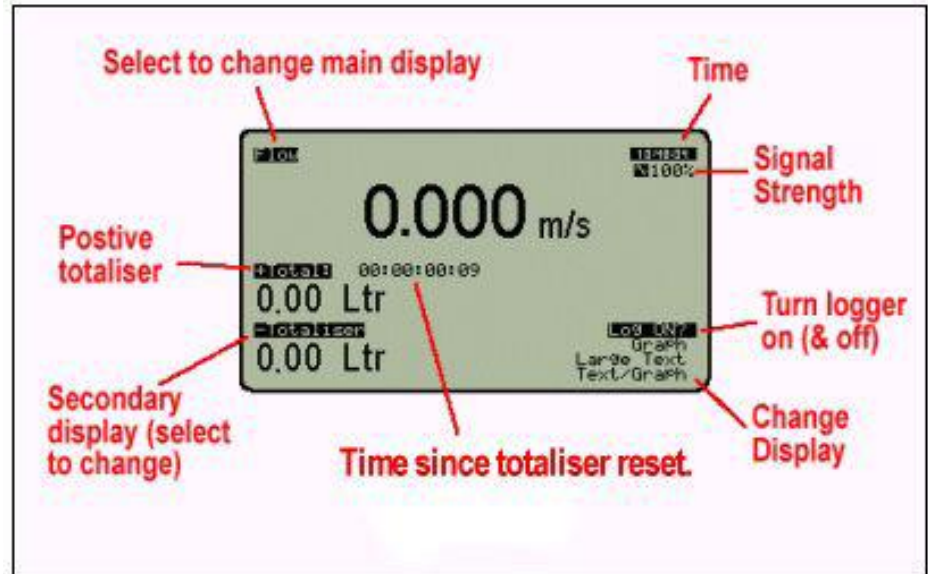

**ChronoFLO has no contact with the fluid in the pipe so is suitable for drinking water and effluents**

**It is easy to install and can be used on a wide range of pipe sizes**

## ChronoFLO Clamp On Transit Time Flow-Meter

- Non invasive flow measurement*
- No loss of pressure or risk of leakage*
- Stable flow measurement in difficult conditions on most pipe material*
- Advanced digital technology*
- Highly accurate even at low flows*
- Portable or fixed using battery or mains*
- Rugged for field use and easy to deploy*
- LCD displays flow rate in both directions*
- Optional gauge measures pipe thickness*
