

Change is in the Air

Did You Know?

80% of your blood

70% of your brain

Less than 0.007%
of all the water on Earth
is available to drink

1 in 3
don't have access
to safe drinking water

A close-up photograph of parched, cracked earth. The soil is dark brown and has broken into numerous irregular, light brown fragments, creating a mosaic-like pattern of cracks. The lighting is bright, casting deep shadows in the crevices. A red rounded rectangle is overlaid in the upper center, containing white text.

**The emerging worldwide
water shortage is
real and serious**

It's been said,
we're going to
run out of water

before we run out of oil.

So what does it all mean?

It's a thirsty world!

A high-speed photograph of water being poured into a pool of water, creating a splash and ripples. The water is clear and blue, and the background is a light blue gradient.

**Atmospheric
Water**

**Th!nk
About
it.**

Did You Know?

Water in the Air

There is more water in the atmosphere than all the lakes, rivers and oceans combined that is constantly recycling.

380,000,000,000,000,000 Three hundred and eight quadrillion gallons

Water from the Air!

Make your own water with an Atmospheric Water Generator

125 gallons daily
Just 4,000 watts!
Go Solar, Go Green

Can be plumbed to appliances.

Larger, whole house units available
300 gallons per day

INDUSTRIAL MACHINES

18,000 liters per day
Can reclaim R/O water-25%
200 tons of cold A/C
Pure Water From Air

The Process

Aquaboy Mini Bottler

3,000 bottles per 8 hour shift

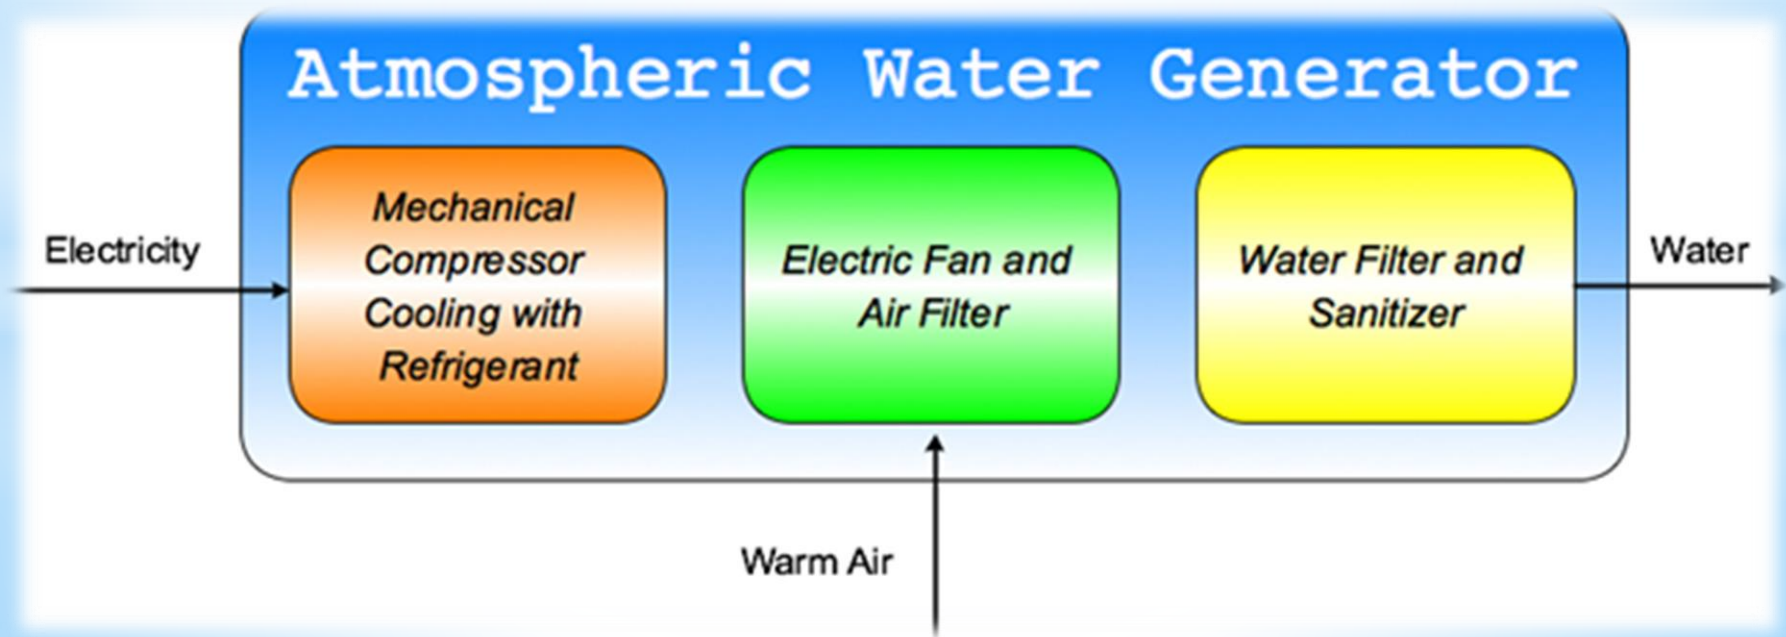

Water Pouch Packing Machine

- Fully automatic
- Excellent performance output
- (13) Speed: - 2000 pouch/hour
- Superior grade stainless steel materials
- Less power consumption
- Precision operational function
- Longer life of the machine
- Machine Dimension: L/W/H:-1200M.M.
900M.M / 2100M.M.
- Machine Weight: - 325 Kg. (Approx)

The Technological Breakthrough

Present machines utilize vapor-compression cooling performed with a mechanical compressor powered by electricity

The Technological Breakthrough

No electricity,
refrigerant, or
moving parts

Atmospheric Water Generator

Gaseous
Fuel

Heat
Absorption

Electric Fan and
Air Filter

Water Filter and
Sanitizer

Water

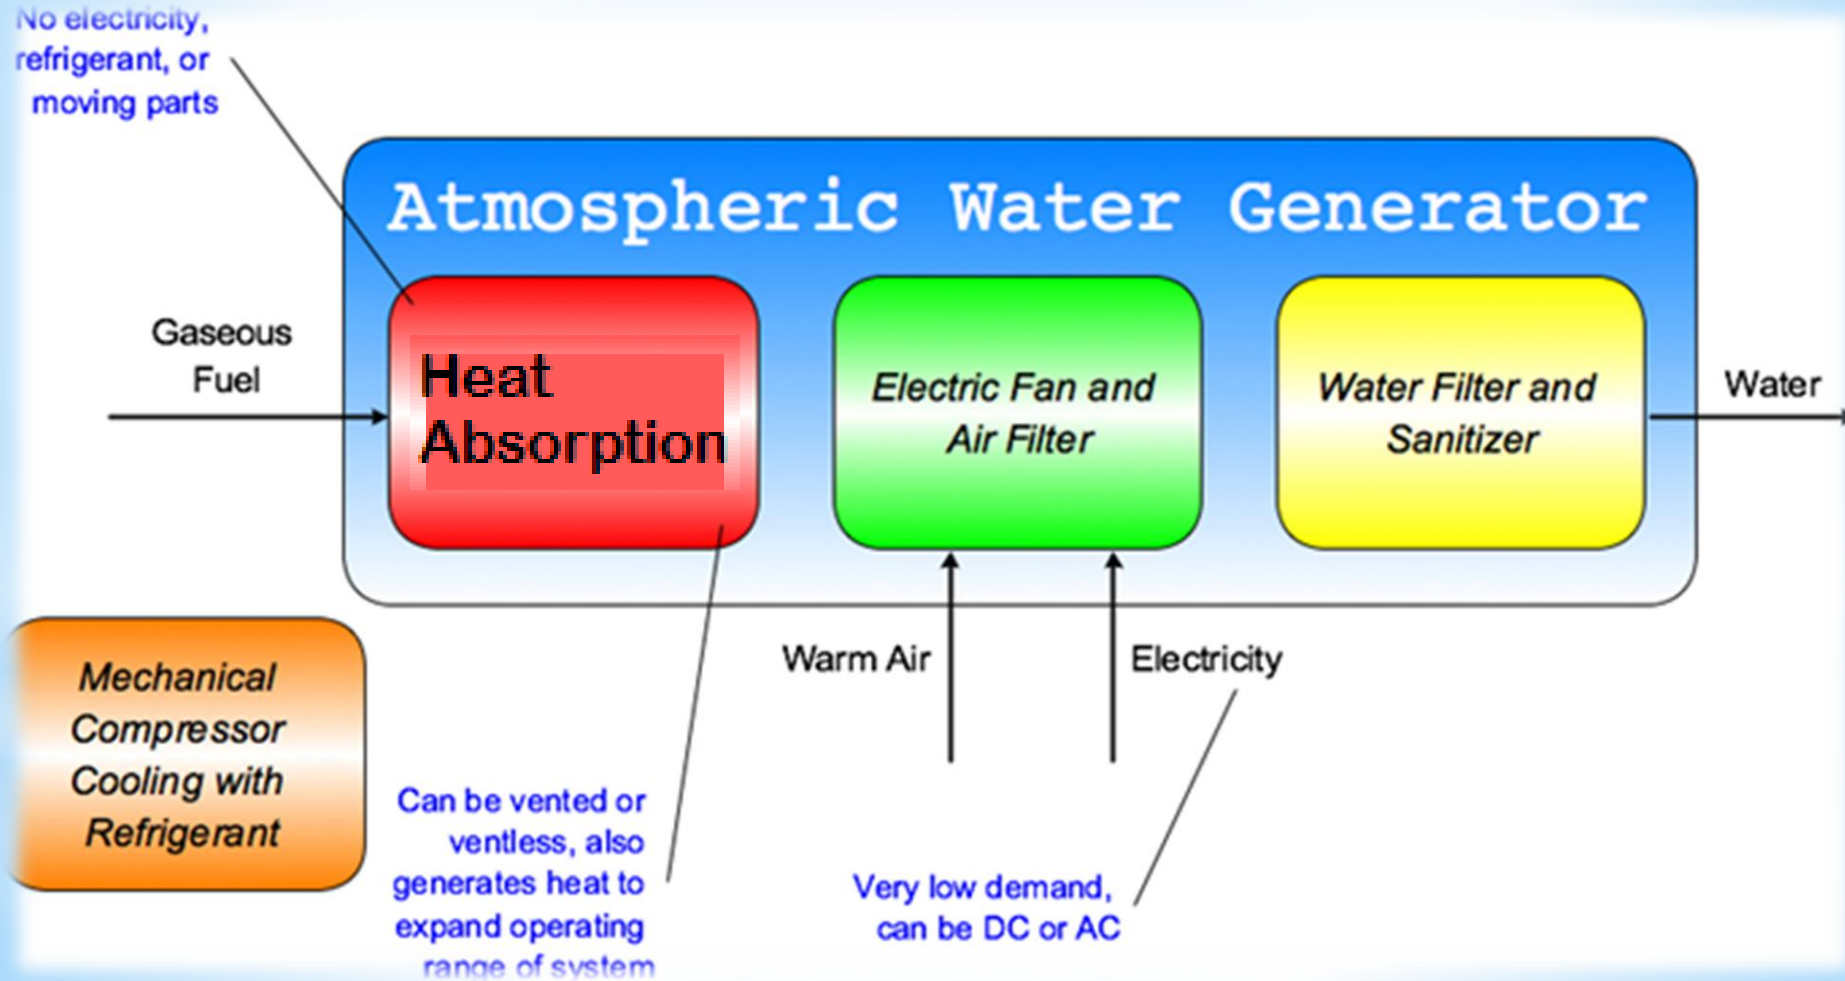

Mechanical
Compressor
Cooling with
Refrigerant

Can be vented or
ventless, also
generates heat to
expand operating
range of system

Warm Air

Electricity

Very low demand,
can be DC or AC

Aquaboy 10 Hybrid

Makes 5 to 10 gallons per day and scalable to commercial facilities.

No compressor or refrigeration used.

Runs on minimal electricity, battery, propane/Natural gas or any other heat source such as the sun, vehicle, incinerator, biomass digesters

Ideal for oil, mining, bottling, agriculture, municipalities, military, humanitarian

Current Heat Source For Absorption System uses propane
Or natural gas at only 280 degrees Fahrenheit.

The Aquaboy 10 uses 1.5 pounds or 1.26 liters of gas per day to make 5-10 gallons depending on humidity. Cost per liter is .015 per liter or \$1.50 a cubic meter

now
YOU know

The image features the text 'now YOU know' on a dark blue background. 'now' is in a light blue, lowercase sans-serif font. 'YOU' is in a light blue, uppercase sans-serif font. 'know' is in a yellow, lowercase sans-serif font. A horizontal yellow line is positioned below the 'know' text. Below the 'YOU' and 'know' text, there are faint, semi-transparent reflections of the letters. The overall composition is centered and minimalist.

We're Changing the World

And we want **YOU** to be part of it!
